Team Contract

Team Name: _____Group A_____

GOALS: What are our team goals for this project?
What do we want to accomplish? What skills do we want to develop or refine?

Our primary goal is to design and develop a robust agent-based system within the selected domain (Digital Forensics / Academic Research Online). The system must successfully identify and retrieve data, process the retrieved data, and store or present the processed outputs according to organisational requirements.
Specifically, we aim to:

- Develop an agent capable of autonomous task execution using goal-driven logic.
- Apply intelligent agent concepts such as goal-based and BDI (Belief-Desire-Intention) models.
- Produce a professional 1,000-word design proposal supported by academic literature.
- Create at least two graphical system representations (e.g., UML class diagram and sequence/activity diagram).
- Ensure the final report is professionally structured, proofread, and business-ready.

In addition to project completion, we aim to develop and refine:

- Agent-based system design skills.
- UML modelling and software design documentation abilities.
- Research, referencing, and critical evaluation skills.
- Collaboration, task coordination, and project planning skills.

EXPECTATIONS: What do we expect of one another in regard to attendance at meetings, participation, frequency of communication, the quality of work, etc.?

As a team of five members, we expect the following from each other:

- Attend all scheduled meetings unless prior notice is given.
- Actively participate in discussions and contribute ideas.
- Complete assigned tasks within agreed deadlines.
- Maintain high-quality academic and technical standards.
- Communicate respectfully and professionally.
- Respond to messages within 24 hours where possible.

We expect transparency regarding workload challenges so adjustments can be made early. All members are responsible for reviewing the final report before submission.

POLICIES & PROCEDURES: What rules can we agree on to help us meet our goals and expectations, such as preparatory tasks, generating ideas, evaluating outcomes?

To ensure effective collaboration, we agree to:

- Hold at least one formal meeting per week.
- Record brief minutes for each meeting.
- Use agreed communication platforms (e.g., WhatsApp/Teams).
- Set internal deadlines at least 3 days before submission.

Project Workflow:

1. Domain selection and requirement analysis.
2. Research and literature review.
3. System architecture design.
4. UML diagram development.
5. Draft writing and integration.
6. Review and proofread before submission.

All major decisions (design approach, methodology, agent model) require majority agreement.

ROLES: Which roles do we need in this project and how do we allocate them? Will there be a project lead? Is there a need to rotate roles?

To ensure clear responsibility, roles are allocated as follows:

- **Project Lead (1 member):** Coordinates meetings, monitors progress, ensures integration of sections.
- **Technical Architect (1 member):** Leads system design, agent modelling, UML diagrams.
- **Research & Literature Lead (1 member):** Manages academic sources and ensures referencing compliance.
- **Implementation & Design Specialist (1 member):** Focuses on libraries, tools, methodology, and design rationale.
- **Quality & Presentation Reviewer (1 member):** Proofreading, formatting, structure, final editing.

Although primary responsibilities are assigned, all members contribute to discussions and review all content. Roles may be adjusted if necessary.

CONSEQUENCES: How will we address non-performance regarding these goals, expectations, policies and procedures? How do we resolve disagreements?

If a member fails to meet agreed expectations:

1. The issue will first be discussed privately and constructively.
2. A revised deadline may be agreed if justified.
3. Continued non-performance will be documented in meeting minutes.
4. Peer evaluation will reflect actual contribution levels.

Disagreements will be resolved through discussion and, if necessary, majority voting. Professionalism and respect must always be maintained.

By signing this contract, we confirm that:

- we have participated in formulating these goals, expectations, roles, procedures, and consequences as stated in this contact.
- we agree to abide by the contents of this contract
